default of \$5,000 bail, but Powell has been about the enty some what in charge of an officer.

A lawyer who said that he represented Powell; but who was not known at the Court of General Sessions, made some inquiries yesterday as to the method in which Powell's release might be obtained. He was informed at the General Sessions that Judge Cowing could not grant a writ of habeas corpus under such circumstances, but that application might be made to a Justice of the Supreme Court. The lawyer left the courtroom to seek his remedy clsewhere.

The continuance of the secrecy respecting 'Powell's detention led to many rumors, one of which was that the District-Attorney had information that the detence in the bribery cases was ready to pay \$12,000 to secure Powell's absence in Europe at the time of the next trial. The lawyer who declared that he represented Powell said that the witness had no intention of leaving the city.

Recorder Smyth will be occupied for a few weeks longer with the trial of bail cases and will then return to Part I of the Court of General Sessions, where the first McQuade find was held. As no trial can be had elsewhere for several weeks, it is now said to be settled that Jacob Sharp will be called to face a jury on the charge of bribery before the Recorder on the first Monday of May. Assistant District-Attorney Nicoll has entirely recovered from the fatigue of the Cleary trial, and Mr. Martine recently received a letter from Assistant District-Attorney John R. Fellows, saying that he would return to this city when needed and would be ready for duty. Ex-Alderman Waite has made visits to Mr. Nicoll's office and the preparation for the trial of a bribe-giver is well under way.

studied reticence of the persons interested the studied reticence of the persons intercessed that Archibald Rogers and C. O. Iselin have arranged for a race for a pint of gold dollars between the Bedoun and the Titania. It is certain, whatever the stiations between the ownrs of the boats may have unted to, that such a contest is hoped for by itsmen. The Bedouin, if not the fastest, is surely good representative, of the sloops of the second ass in the New-York Yacht Club, and the outcome of a race between her and Mr. Iselin's new steel singlepicker would go a long way toward determi sticker would go a long way toward determining whether steel hulls are superior to wooden ones for racing boats. It has been proposed that, should such a coatest be arranged, the owners of the Gracie, Mischief and Shamrock be permitted to enter their boats. With such a bevy of fivers on the course, an exceptionally interesting race would unquestionably result. The stake said to have been proposed by Mr. Iselin is so original in character that it has already created considerable discussion. To satisfy his curiosity on the subject, a member of the New-York Yacht Club went into the Philadelphia mint a day or two ago and had enough gold dollars dumped into a punt measure to fill it to the brim. It required 3,400 of them to fill the cup and they were not packed closely either.

Now that the authoritative conditions made by Tankerville Chamberlayne for the race between the Arrow and the Mayflower for the Queen's Cup have been placed in teneral Paine's hands and are found to be the same, in effect, as those cabled from London more than a week ago, it is more than probable that the Mayflower will remain on this side of the Atlantic this summer. While it is probable that General Paine's yacht could beat the Arrow, even under the conditions imposed, the General in refusing to bolt his centreboard, and thus virtually sacrifice the American principle of yacht-building, will be supported by all American yachtsmen and many of those in Great-Britain. It is not unlikely now that Designer Burgees will see two of his latest models striving for supremacy in the America's cup trial races next fall, as the steel sloop which Pusey & Jones began work upon at Wilmington Monday will be constructed whatever may be the disposition made of the Mayflower.

Commodore A. Cass Canfield placed in the New-York Yacht Club's model-room yesterday the model of a large sloop which he has lately completed. It is designed to be worked out into a 122-ton vessel, 102 feet over all, 87 feet at the water line, 22 feet 9 inches extreme beam and 10 feet draught.

Some of his friends have arranged a dinner in his honor at the club house for an evening early next week. ORGANIZING A TARIFF ASSOCIATION. THE NEW-YORK TO BE THE SUCCESSOR OF THE

METROPOLITAN—ITS FEATURES.

P A meeting of the New-York Tariff Association was held at No. 153 Broadway yesterday afternoon, to effect the organization so that it could take the place of the Metropolitan Association of Fire Underwriters which disbauded on the withdrawal of the Williamsburg City Fire Insurance Company. The New-York Tariff Association was in existence before the Metro-Tariff Association was in existence before the Metropolitan Association was formed, but it was not strong enough to exert the control and influence over the insurance business of this city that was desired by the large companies, and the Metropolitan Association was formed to make the rates and keep brokers from undercutting each other. There are still thirty-three out of the 160 insurance companies doing business in this city that have refused to sign the new contract, and the meeting yesterday was to allow them an opportunity of doing so it they desired to. But they delate one in and an extension of time to Saturday next was given, and if they have not their names on the books then the effort to continue the "compact" will be given up.

books then the effort to continue the "compact" will be given up.

There has been formed a new fire insurance company under the name of the Alliance Fire Insurance Company. It is backed by a tew large companies an 1 has e capital of \$300,000. Business will be begun on May 2. A large number of brokers are members of the new sompany and inside of it is a Brokers' Board, of which early stockholders of the Aliance Company can be members. The object of this new company is to keep up insurance rates and to distribute equally among the companies behind the business of the brokers. Since the disbandment of the Metropolitan Association there has been a considerable change in insurance affairs. Bisks on short time at high rates have been withdrawn and new policies at lower rates and for a longer time have been issued in large numbers.

Mr. Folsom the matter is by no means ended. In case the referee reports in Dr. Cate's tavor, as he intimated he would at the hearing on Tuesday, there will be a bill of costs tor which Mr. Folsom will be responsible. Should he not pay these costs William H. Mundy, his attorney, will be liable for them to the amount of \$3100. In view of the turn which this case has taken, if the costs are not baid an attachment will be taken out against Mr. Mundy.

Neither are Miss Folsom's legal troubles over. At the hearing of the case on Monday she was served with a summons in a suit brought against, her by an Italian whom she had engaged to give her music lessons. At the time the summons was served Miss Folsom treated the matter lightly and said that she did not eve the singing master anything. She turther said that some time ago when she was advised to cultivate her voice, not being able to pay the teacher his price he offered to instruct her for nothing consider.

THE MYSTERY OVER POWELL

IS SHARP ANXIOUS FOR HIS ABSENCE?

A REPORT THAT THIS IS WORTH \$12,000—FULLGRAFP'S BAIL REDUCED.

District-Attorney Martine's present policy of not saying anything even on unimportant matters consected with the bribery cases was continued yesterday so far as to lead him to refuse to answer any questions about George V. Powell, the witness ugainst Jacob Sharp, who is in custedy under an order of commitment issued by Judge Cowing. The order was for Powell's commitment to the House of Detention in default of \$50,000 bail, but Powell has been about the city some what in charge of an officer.

A lawyer who said that he represented Powell; but who was not known at the Court of General Sessions, made some inquiries yesterday as to the method in which l'owell's release might be obtained. He was informed at the General Sessions that Judge Cowing and the proceedings in the street she would not street she would not have been begun. SURPRISING RESULT OF A BALL GAME. HAPPY LOT OF COLLEGE BOYS-BOSTON BEATS

The ball game at the Polo Grounds yesterday was between the New-York League Club and the Columbia College nine. The former ought, of course, to have won with perfect case, but they did not. The professionals played with the students as a cat would with a partly disabled rat, but when they attempted to inflict the final punishment they found that they had tarried too long. The New-York players slunk toward their club-house after the game looking like whitpsed curs. George pitched for five ninnings, simply sending slow "drops" to the collegians and was of course batted freely. Mattimore was also his hard in the four innings that he pitched. The friends of the students were widdly hilarious over the victory. The score was: BROOKLYN.

THE EXCISE MANDAMUS LAW.

A LETTER IN WHICH THE COMMISSIONERS URGE T AT IT SHOULD NOT BE REPEALED.

The Commissioners of Excise, having been asked to appear before the Excise Committee of the Assembly to give their views upon the proposed repeal of what is known as the Excise Mandamus law of last year, sent the following letter, which was received by the chairman of the committee yesterday :

the committee yesterday:

OFFICE OF BOARD OF EXCISE,

54 BOND-ST.,

NEW-YORK, April 12, 1887.

Hon. A. C. BRUNDAGE, Chairman, Committee on Excise,

Assembly, Albany, N. Y.

SIR: Your notice that an opportunity would be given the Commissioners of Excise to be heard upon the bill to repeal Chap. 456 of the Laws of 1846, known as the Excise Mandamus law, before your committee, on April 13, 1887, was duly received. It was the intention of the Commissioners to appear before your committee in response to that notice. We find, however, that the pressure of business, areater at this time of the year than at any other, will make it impossible for us to be absent from cutting. We are compelled, therefore, to send our princip. Chap. 406 of the Laws of 1880 ought not to be repealed. While the law was, perhaps, not as carefully drawn as it might have been, the principle upon which it is based is correct and ought to be preserved. From the very necessities of their position, Commissioners of Excise are endowed with extraordinary powers—powers which, in our opinion, are greater than ought to be conferred upon public officers without the power of review. The excretes of an arbitrary power, guided only by the discretion of the officer, and without the possibility of appeal, is liable, and under some conditions certain, to be abused. Against such abuse the right of appeal is a safeguard to which every citizen should be entitled.

It is a fundamental principle of our Government that the acts of the legislature itself is subordinated to this review; and it is difficult to see upon what arguments the right of the courts to review the acts of State or local officers can be denied. Certainly, if abuses exist, such review is essential for protection. The fact that in the City of New York, under this law, the courts have uniformly sustained the Commissioners of Excise connict been abused. It in a let to be made in the existing law, we would safe the action of Excise Commissioners of Excise an only be construed as evidence than the exis

All varieties of lace may be found at the lace counters of this house. Black Chantilly and Freuch lace is the most popular black lace of the season. Point de Genes is a heavy lace copied from the old Genose laces of the Renaissance; it is used for garniture and for entire costumes over allk or satin.

A NEW BAPTIST CHURCH IN BROOKLYN. MANY NOVEL FEATURES IN THE BUILDING-A SUC-

One of the finest church edifices in Brooklyn is Just being completed for the Emmanuel Baptist so-ciety at the northwest corner of Lafayette-ave. and St. James-place. The cost of the entire property has been over \$200,000, and the expenditure has provided one of the most completely appointed structures recently built. The material used is Ohio sandstone, and the architecture is the Norman Gothic of 8 13 27 13 5 Total....... 6 11 27 18 3 the fifteenth century. The front has two square tow-

In the gable is a has relief of John the Baptist, and over the main entrance will be placed a representation of Christ blessing children, Considerable carved work adorns the exterior.

Within the church possesses some striking peculiarities. Instead of the windows rising from the lower foor and being divided by the gallery they all start at the gallery floor. The auditorium is square and no columns support the roof save two at the rear, giving an unmolested view of the pulpit from all parts. The ceiling is nearly 100 feet from the floor and is of woot and hollow, so that it forms a sounding board. Both the ceilings and wails are finely frescoed. Beautiful stained glass windows light the auditorium. The pews are of antique oak in amphitheatre form and the floor slopes from the entrance to the pulpit. Back of the pulpit is a baptistery, and above that the choir gallery, with the organ in two parts on either side. The church scats 1,000 persons and the accustic qualities are good. Contrary to the rule in most churches the gallery pews are more desirable than those on the ground floor.

The society is only six years old and was formed

CONVICTS WORKING AS FIREMEN.

THE STATE LAUNDRY AT SING SING DESTROYED-

HOW THE PRISONERS BEHAVED. ir brick walls and a heap of ashes and debris are all that remains of the State Laundry at Sing Sing Prison. It took fire at 8:10 o'clock yesterday morning, and the in-terior was entirely consumed. The building was a three-story brick structure, 250 feet long and 60 feet wide, and in it were employed 250 convicts, among them Crowley, O'Neil and McQuade. The laundry, like the other workshops, stood north of the prison, in the large yard, and some 500 feet distant. It was not connected with any other shop, but stood near the shoe-shop and State repair shop. The mess-room, kitchen and store-room were also near at hand, but none of them was damaged to any extent.

Yesterday morning, about half an hour after the convicts had gone to work in the laundry, there was an odor of burning cloth, but it was thought that some convict had burned a shirt with a hot iron. No burned shirt,

victs had gone to work in the launary, there was an oad of burning cloth, but it was thought that some convict had burned a shirt with a hot iron. No burned shirt, however, could be found. The smell grew more percept ible, and soon smoke was seen coming from the drying room at the east end of the shop. When the door was opened, the flames burst forth in great fury, and then there was a stampede. Principal Keeper Connaughton gave the fire alarm on the prison-grounds, and also sent out a telephone alarm to the viliage. The prison is provided with an excellent fire service. There are five sets of hose and five fire plugs connecting with the Croton mains on the hill, which furnish a tremendous pressure. There was no time lost in getting five streams on the fire. The village firemen also arrived promptly, and soon had five more streams on the burning building. The fire was thus got under sufficient control to keep it from spreading to the adjoining buildings.

When the fire broke out, the convicts not needed to work at the fire were hurriedly marched to their cells in good order. Other volunteer convicts were set to work and rendered excellent service. Especial mention is due to Thomas Frankin, of Yonkers, sent up for blgamy. He has been a fireman, and he knew what to do and how to do it; but he came near losing his life while tearing down a part of the burning roof. He fell from exhaustion, and was carried to the hospital. He is not seriously injured. "Johnny" Hope, Sergeant Crowley, McQuade and a convict named O'Rourke were also active in getting the fire under control.

In the store-room were 4,000 dozen shirts, all of which were safely removed by the convicts. John Simon, a tenyear convict, was cut on the hand with broken glass, and "Paddy" Wallace, a life man, was somewhat burned between the shoulders by a falling timber, and bruised on the shoulder. All were sent to the hospital. In the confusion it was feared that some of the convicts would escape, but none got away. Sammel Frickhaver, a burgiar, was missed f

PLUMBERS' SUPPLIES DESTROYED. Flames were discovered on the third floor of No. 52 Cliff-st. yesterday morning by the policeman who patrols that beat. The building was occupied by Frederick Adee that beat. The building was occupied by Frederick Adee & Co., dealer in plumbers' supplies. The third and fourth stories were sadly wrecked and F. S. Talimadge, the owner of the building, believes that it will cost from \$2,500 to \$4,000 to restore it to its former condition, but the insurance a ents think it can be done for less money. The building was insured for \$20,000 Frederick Adee & Co. hold insurances for \$42,000. They estimate the losses on their stock at about \$35,000.

TWO FIREMEN KILLED IN CHICAGO. CHICAGO, April 13 .- J. J. McGrath's wall-paper ras destroyed by fire early this morning. The stock is an entire loss, and the building is irreparably injured, the floors having fallen. The front and rear walls are ruined. Pipeman Michael Burns was standing in a fourth-story window when a sheet of flame enveloped him and he fell into the biazing mass inside. John Heberlie, lieutenant of engine No. 32, was climbing a ladder to the second story, when it slipped, and he fell to the sidewalk, crushing his skull. Captain Frederick, Reese had his leg broken by a falling stone. The floors began to fall within three-quarters of an hour after the fire started. Firemen say that they have never before seen such a rapid and complete a destruction of a large establishment. The fire was out at about 5 o'clock, and owing to the exertions of the firemen little, if any, damage was done to the adjoining buildings, which are occupied by wholesale lewelry and millinery houses.

The latest estimates of the loss on stock by the Me-Grath fire make the aggregate anywhere from \$300,000 to \$450,000. The insurance aggregates \$140,000, as follows: Lion, of England, and Queen, of England, Charles E. Buch.

LOSSES IN VARIOUS PLACES. LINCOLN, Neb., April 13 .- Along the branch line of the Burlington and Missouri Railroad a large number of settlers have lost their all by prairie fires. Rathroad men say for miles every foot of ground is burned over. A large force of railroad graders on a line southern Furnas County were surrounded in camp by the fire and the men escaped only by leaving their tents, clothes and everything behind at the mercy of the flames, One man was so seriously burned that he cannot recover. A private dispatch to this city from an official of the road in that vicinity estimates that at least a dozen lives have been lost in the two days fires. WOOSTER, April 13 .- D. C. Currie & Company's planing

mill was burned this morning. Loss, \$25,000; insurance, \$7,500 MILWAUKEE, Wis., April 13 .- A dispatch to The Evening Wisconsin says that nearly all the business portion of Janesville, Minn., was destroyed by fire last night. Twenty-one buildings are reported burned with a total loss of \$20,000. KEENE, N. H., April 14.-W. C. and R. M. Silsby's fan-

nery, at Troy, N. H., was burned this morning, with several other buildings. The losses amount to \$27,000 and the insurance to \$16,900. Bondentows, N. J., April 13.-The barn and outbuildings on the farm of B. R. Powell, near Pemberton, Burlington County, were burned last night. The loss is about \$5,000.

NEW BEDFORD, Mass., April 13.-E. A. Boomer's millinery store was partially burned this morning. The stock and fixtures were valued at \$4,000; insured. The loss on the building is \$500; insured.
